

Sports Structure Supply

Project: Melbourne Park, Chelmsford

As part of Towermaster's fiftieth year, we have been reviewing and showcasing some of our previous projects. In 2012 we supplied Melbourne Park, Chelmsford with eight 12m [manual base hinged columns](#).

The park is home to a new artificial sports pitch which is used by the members at Chelmsford's Sport and Athletic Stadium.

The manual base hinged columns ensure ease of maintenance at the site as maintenance is simply carried out by just one person with the portable raise/lower frame.

To find out more about this product, download the [product data sheet](#) or contact our sales team on 01376 320100.
